Data&SQL Analytics | System Analysis | Cross-functional Collaboration | Process Automation |
Project & Program Management | Operational Excellence

SUMMARY

Data and process-oriented Senior System Analyst with 5+ years of experience improving operational workflows, building data-driven solutions and coordinating cross-functional digital transformation projects. Hands-on experience with SQL analysis, reporting automation, dashboard requirements, root-cause analysis, process standardization, and enterprise system implementation. Proven ability to translate operational pain points into scalable solutions, align business users with technical teams, and drive adoption through training, documentation, and continuous improvement.

EXPERIENCE

Senior System Analyst & Product Manager  **GIS RESEARCHERS & PLANNERS, INC.** (B2B SaaS)
09.2022– Present

- Led 100% on-time delivery across 20+ software and digital platform initiatives, representing NT\$5M–30M in project budgets and teams of 8–15 members, by managing schedules, milestones, risks, dependencies, and stakeholder alignment.
- Conducted requirement clarity and implementation readiness across 20+ projects, as measured by the completion of functional specifications, process flows, acceptance criteria, and implementation plans, by conducting stakeholder interviews and operational process workshops.
- Optimized database performance and operational data accessibility, achieving a 10% reduction in query execution time by investigating data issues, validating system outputs, refining SQL queries, and supporting operational reporting.
- Automated recurring data-processing and reporting workflows by replacing manual consolidation steps with standardized SQL queries, structured data outputs, and reusable workflow-based solutions.
- Integrated GIS, IoT, CCTV, sensor, and business data into real-time monitoring dashboards, improving operational visibility and decision-making by defining data relationships, visualization requirements, and user workflows.
- Drove root-cause resolution and corrective-action implementation across engineering and QA teams by improving system reliability through structured issue investigation, action tracking, and validation.
- Standardized project governance across concurrent initiatives by implementing reusable templates, SOPs, requirement documents, testing scenarios, and handover standards, strengthening transparency, onboarding efficiency, and delivery consistency.
- Enabled successful delivery across multidisciplinary project teams, as measured by coordinated releases and resolved cross-functional blockers, by aligning engineers, UI/UX designers, QA specialists, project managers, and business users on priorities, scope changes, and implementation decisions.
- Coordinated cross-functional project delivery across engineering, UI/UX, QA, project management, and business teams by aligning priorities, scope changes, and implementation decisions, resulting in coordinated releases and faster blocker resolution.
- Drove user adoption and operational readiness across government and enterprise organizations by delivering 20+ training workshops and stakeholder adoption sessions, developing training materials, demonstrating system workflows, and incorporating user feedback into continuous improvement.

INTERNSHIP EXPERIENCE

INTERN GIS RESEARCHERS & PLANNERS, INC.

02.2021– 07.2021

- Delivered UAV certification training for students and professionals by explaining drone operations, flight-license requirements, and exam preparation procedures.
- Developed aerial-imaging and mapping demonstrations for terrain and environmental analysis by integrating UAV imagery with geospatial visualization platforms.

EDUCATION

Feng Chia university (2021-2022)

M.S. Master's Program for Smart City

Database Systems / AI Applications / Big Data Analytics

Feng Chia university (2017-2021)

B.S. Department of Aerospace and Systems Engineering

Systems Engineering / Project Management / Human–Machine Interface

SKILLS

Data Analytics: SQL, Excel, Visualizations (Tableau), Data validation, Operational reporting, Dashboard requirements

Automation & Workflow: Visio, draw.io, XMind, Process mapping, Workflow redesign, SOP development, Issue tracking

Project & Design Tools: Notion, Trello, GitHub, Bitbucket, Figma, Axure RP, Excalidraw, balsamiq, JMeter, Prott, RAG, AI Agent workflows, ChatGPT, Claude, NotebookLM, Gemma

Languages: Mandarin(Native), English(C1), Toeic(785)

User Research: SurveyCake

Other Activities: Sprachcaffe Language School in Malta

Certifications: PMA, Google Data Analytics Certification
